# Lifestyle segmentations

### Classic

---

Classic users appreciate products that combine the aesthetics of the past with present day technology.

This nostalgic link to former periods brings with it an insinuation of quality and bespoke hand-crafted luxury. 'Real materials' with ornate detailing radiate an intricate and rich aesthetic, yet performance and elegance are important to this segment.

### Transitional

---

Transitional users value established quality and styling that maintains both a nod to the past and a firm look to the future. With a preference for harmonious soft flowing lines and conventional aesthetics, they select materials for their honesty and rational performance.

This profile tends towards an informal, casual attitude with an appetite for purposeful comfort and balanced appearance.

### Contemporary

---

Contemporary users are confident and positive about the future. They desire the latest technology and are fearless in exploring modern aesthetic trends. With a preference for sensual simplicity, they expect their products to balance design and functionality. A reduced expression of form allows emphasis of the material, quality, texture and detail.

Trends are often born within this segment, which tends to stretch the imagination.

A photograph of a modern bathroom interior. In the foreground, a dark wood vanity with a white marble top holds a white vessel sink and a chrome faucet. A small black tray with a glass of toothbrushes sits on the counter. Above the sink, a rectangular mirror is mounted on the wall, flanked by two wall-mounted lamps with pleated shades. To the right, a white freestanding bathtub is visible near a window with sheer curtains. The floor is covered in large, light-colored marble tiles.
